## INFERION

Hell, as an idea born from Chaos, pierce each one of the myriad facets of Its content, defines Its center and directs Its evolution.

It is beyond the efforts to simplify, against the constant appraisal and it will never be contained within any bounds. Cognition of it is possible only in empirical comprehension of Its principles, when containing them deep inside, in conquering self-restriction and in becoming the part of it. The figures of Inferion - milestones on the way of cognition of Hell; they are the marks of its principles.

Inferion - we chose this mode of Hell's manifestation as one of many in our capacity, when we were being induced with aim common with Hell's endless expansion.

The memory of Abyss within our hearts was profound basis of this work; our knowledge and our experience were realizing it into this world; power of our blood was enforcing Inferion and every our step was adjusted with the will of Hell.

When realized Inferion in this world, we hadn't created some another metaphysical system. Elements of Chaos feed its existence, and Inferion is resonant to eternal vibration of Its waves, which is alien to static.

In the same time Inferion is not anti-tarot, neither reversed Order. "The way of kings" in whole its all-comprehension lights up only its own part of world creation that can be seen from the gorges of human fatum.

Moreover, tarot is bleed-white being used for low and petty purposes, and that's why it is deprived of the possibility to pretend to any serious deeds.

Inferion - different apprehension of the Universe, inherent in our tribe.

It is the way covered with impenetrable Darkness on the all pre-existed cards break on through the borders, beyond which there are territories belonged to Chaos.

It is no-restrained might bursting out of It.

Inferion reflects primordial and general, and where it intersects with tarot there two beginnings of the Universe opposed to each other collide and inter-penetrates, playing with faces of each other.

Leaving Inferion here, as our legacy, we are not satisfied with success, but following our nature we are heading for even more, beyond the limits of realized.

Studied severities we know that only cognition by own will can satisfy the thirst of comprehension of Abyss and can lead to the truths beyond the limits.

Penetration into the essence of each figure of Inferion, into the nuances of their cooperation - it's for the chosen, and we should not facilitate their mission with superfluous explanatory notes

- Inferion is deserved to the efforts of the worthy one.

Three-headed principle of evolution of Hell is realized in Unholy Trinity - official symbol of martial nature of Evil. It manifests in alterations of Eternity and in fall of the last Aeon.

Beyond them there are all-pulsing and ever moving Forces of Supreme Evil and fullness of all-embracing multitude of the Abyss.
